Kristi Noem - 13.76%

Donald Trump - 80.78%

Charles Strange - 1.67%

Angelina - 1.02%

Yanni - 1.72%

Heather - 1.05%

## Notes:

Summary by ChatGPT

- Housing and Interest Rates: Trump discusses the high costs of home building, particularly the impact of planning and zoning fees. He promises to lower interest rates to make homeownership more attainable for Americans, calling it part of the "American

dream."

- Energy Independence and Lowering Prices: He pledges to significantly cut energy costs by expanding domestic drilling and reducing dependence on foreign oil, which he believes will lead to lower prices overall, including for housing and consumer goods.

- Immigration's Economic and Social Impact: Trump argues that illegal immigration is harming American families, especially Black and Hispanic communities, by straining resources, such as schools and healthcare, and by increasing job competition. He vows to close the border to illegal immigrants and allow only legal entry.

- Support for American Farmers: He addresses the economic challenges faced by farmers, claiming that current policies have hurt them and pledging to restore beneficial trade deals to improve their financial stability.

- Election and Voting Process Reforms: Trump expresses a desire to streamline and reform the election process, voicing dissatisfaction with early voting timelines and emphasizing the need to restore integrity and simplicity to U.S. elections.

**Kristi Noem**

**00:00:01**

Welcome, President Trump.

**Donald Trump**

**00:00:14**

Thank you. Verma. This is a nice crowd.

**Kristi Noem**

**00:00:18**

Yes. They love you. You know why? It's because they recognize, sir, that you're the one who fights for them. You're the one who protects them.

**Donald Trump**

**00:00:30**

And you know what else? They fight for themselves. And they've been fighting for a long time. And we're going to make your fight easier, very important to make it easier, because what's happened to our country in the last, almost four years now, it's hard to believe, but, uh, if you look at the borders, if you look at inflation, you look at the Afghanistan disaster, the most embarrassing time in the history of our country, I think the most embarrassing moment in the history of our country, Afghanistan.

The way they did, not getting out. I was getting out with dignity, strength. The way they got out was the most embarrassing thing that ever happened. Probably led to Putin going into Ukraine. He looked at it. He said, these people aren't very good, are they? He would have never done that with me.

**Donald Trump** 00:01:14

So, uh, you know, we're all in this together. We got to win the election November 5.

**Kristi Noem** 00:01:19

Yes. And, sir, he has never yet, uh, called those gold star families for the people and the soldiers that we lost that day. And who controls that airstrip now?

**Donald Trump** 00:01:34

China.

**Kristi Noem** 00:01:35

China, yes.

**Donald Trump** 00:01:38

No, they have, you know, China took over, and one of the things, get out. We were there, like, for 20 years. I said, what are we doing here? So we get the hell out. But, you know, I had a talk with the Taliban, and we didn't lose one soldier in 18 months until this catastrophe happened, when they took over.

**Donald Trump** 00:01:56

But, you know, one of the things we, uh, aside from everything else, we left, we spent billions of dollars years ago to build a big air base. And you knew that one from your own time.

**Kristi Noem** 00:02:07

Yes, I did.

**Donald Trump** 00:02:08

A big one. A, uh, really good one. Powerful runways, long runways, and you know what happened? I'll tell you. They, uh, they gave it up, and it was 1 hour away from where China, Bill, forget about Afghanistan. 1 hour away from where China builds its nuclear weapons would have been very nice to have.

And China now occupies that air base, so. It's terrible. It's terrible.

**Kristi Noem**

00:02:30

It is. Mister President, as you can see, we've got a lot of american patriots here tonight who want to ask you some questions.

**Donald Trump**

00:02:35

Good.

**Kristi Noem**

00:02:36

If you don't mind, we'll move into that portion of the town hall tonight. Let's go to our first question. Our first question is going to be from a man named Reed. And, Reid, I'm not certain where you are.

**Donald Trump**

00:02:48

Where's Reed? There he is. Hi, Reed.

**Kristi Noem**

00:02:50

There he is over there.

**Donald Trump**

00:02:51

Nice looking guy.

**Kristi Noem**

00:02:52

Uh, and Reed, I believe you're a Navy Seal, correct?

**Donald Trump**

00:02:54

No.

**Kristi Noem**

00:02:54

No. Okay, I got that wrong. All right. Thank you very much.

**Donald Trump**

00:02:58

Good evening, Mister President. My name is Reed. I'm a single father and Iraq war veteran. I dream of owning a home for me and my son, but mortgage rates under the Biden Harris administration have made that impossible. What can you do to help make home ownership affordable again? All right, good. It's a great question, and a lot of people

have this question.

**Donald Trump**

**00:03:20**

First of all, it's too expensive to build the homes, and they're building them, and they cost a fortune. And 30% of the cost in some locations is, uh, the cost of, like, planning and certificates and all. A lot of nonsense they do. They make you go through hell. It takes years to get them zoning approvals, all of the approvals you need.

**Donald Trump**

**00:03:39**

We're going to get rid of a lot of that. But most importantly, we're going to get interest rates brought, uh, way down. You know, we were. We had interest rates at 2%, and now they're 10% and you can't get the money. We had 2%, and there was plenty of money for everybody. And, you know, I call the home part of the american dream.

**Donald Trump**

**00:03:56**

We're going to create the american dream for young people and for older people, too, by the way. We're not going to forget, I mean, I happen to be a very young man, but we're not going to forget the older people. We're not going to forget the older people. By the way, no tax on Social Security benefits for the older people.

**Donald Trump**

**00:04:16**

For those of, I guess, you know, somebody said, oh, he's got a conflict of interest because he benefits by that. I'll give mine up if you want. I save tax. But, uh, no, we're going to do that for the older people. That's a big deal because you've been eaten alive with inflation, and all I'm doing is getting you back to even.

**Donald Trump**

**00:04:35**

I think when we do that, we're probably just getting you. You know, you have fixed income and you went up numbers like 30, 40, 50, depending on what they included. You know, they like to say it was a 20% increase. It wasn't. It was 30, 40, and 50, depending on what they want to include.

**Donald Trump**

**00:04:51**

So we're going to do that. But, Reid, getting back to you. Uh, we're going to drill, baby, drill. We're going to have so much energy, and we're going to bring prices down because, you know, your prices are up. Don't forget, the damage is done. We have the worst president and the worst vice president in the history of our country by far.

**Donald Trump**

**00:05:12**

And let me tell you, she is worse than him. And he's actually, I didn't think I'd ever say this about anybody. She's actually, you take a look at, she's more dangerous than him, but he's actually smarter than her. I never thought I'd say that. I never thought I'd say that. But look, we're going to get it down.

### **Donald Trump**

**00:05:32**

We're going to drill, we're going to get the energy down. When the energy comes down, prices are going to come down. All of that prices because you know, when they say, oh, although they had very bad inflation numbers last month, you saw that very, very bad inflation numbers. Despite the big, you know, they did this big drop, probably too big a drop.

### **Donald Trump**

**00:05:51**

I'm not going to get into that, but we're going to get the prices down because the damage has been done. If we had no inflation, now such damage has been done, the highest, in my opinion, the biggest inflation in the history of our country. They didn't include a lot of the bad numbers.

### **Donald Trump**

**00:06:08**

I'll give you an example on housing and on different things like crime statistics are fake. They were fake statistics. They didn't include some cities that were really bad so the crime looked like it was just bad as opposed to being horrific. Jobs 818,000 fake jobs. They added and they padded the job numbers a couple of months ago so that they'd look better on jobs 818.

### **Donald Trump**

**00:06:35**

They were fake. They were fraudulent jobs and they thought they'd announced the real numbers after the election. But we had a whistleblower or somebody that let it out. So they cheated us on 18. Think of that. 818,000 jobs they cheated. You know, usually when you have those numbers, it's 9000 jobs off. This is almost a million jobs off.

### **Donald Trump**

**00:06:57**

It's not even possible. So we're going to bring things. And Reed, you're going to buy that house and you're going to pay 2.53% interest and you're going to say, I love this guy because interest rates, Reid, will follow as the energy goes down. And I made another commitment. I made it over the last month.

### **Donald Trump**

**00:07:15**

I've been making it. We have more liquid gold under our feet than Saudi Arabia, than

Russia, than any other country. I'm going to bring down your energy costs 50% in the first year. Five, zero. Fifty percent. And I better do it because I'm all over the place saying, I'm going to have problems if I don't get it done.

**Donald Trump**

**00:07:35**

But we have all the capacity to do it. Nobody else can make that statement. We have so much energy, we don't even use it. We get energy from Venezuela. They don't have good oil. You know, they have tar. They have tar that you have to liquefy. And you know where they do it?

**Donald Trump**

**00:07:50**

In Houston, Texas, because that's where we have the plant. It's the only plant in the world that can do it. We do it in Houston. So for the environmentalists out there, this is not a pretty picture, what flows into the air, right? But we're going to use our beautiful liquid gold. And when we get everything else down, houses, everything's going to come.

**Donald Trump**

**00:08:09**

It's going to be beautiful. You're going to have a house. Just wait a little while. Give me a little while. Let me get in one year, from January 20, we will have your energy prices cut in half all over the country.

**Kristi Noem**

**00:08:22**

Thank you. And Mister president, in reference to Reid and his family, he's not in a unique situation. 65% of Americans today cannot buy a home. That has dramatically changed under the Biden Harris administration. And Kamala Harris has embraced the policies that made home ownership disappear and disappear and take away that opportunity from Reed and his family.

**Kristi Noem**

**00:08:47**

And 65% of Americans today. Listen, the american dream is still to own your own home. And now that is not possible because of what they've embraced. And you talk about liquid gold. If any state understands liquid gold and american energy, it's Pennsylvania.

**Donald Trump**

**00:09:02**

Yeah. Um, the commonwealth. Make sure, make m sure you know.

**Kristi Noem**

**00:09:06**

The commonwealth of Pennsylvania.

By the way, this is a really great governor, very successful governor. She read some of the numbers, and I thought she would, because why not? Nobody else will do it, but I will.

**Kristi Noem**

**00:09:17**

I did it.

**Donald Trump**

**00:09:17**

I do it for my friends. You did it beautifully, too. Uh, she has done a fantastic job as governor. And I will say this. Um, I went to school here. You never. I just want to, I just want to forewarn her because I've seen it happen in its career threatening. Don't ever call it a state.

**Donald Trump**

**00:09:34**

It's a commonwealth. And I was saying, lesson learned. Has somebody, because a lot of innocent lambs have come up and they start talking to the people of Pennsylvania. I love you people. I know you so well. I'm here all the time. I'm, um, here all the time. Yeah, I went to school here.

**Donald Trump**

**00:09:51**

I went to the Wharton school, the great Wharton School of finance, and they were great. It's a great place. It's a great place. But I went. I went to college here, so never, uh, ever even think I watched one man crash and burn. He kept calling it this state. I kept saying it's a commonwealth.

**Donald Trump**

**00:10:11**

And by the time the evening, I think his political career ended there.

**Kristi Noem**

**00:10:14**

Sir, uh, tonight we have some special guests in the audience. We have a gold star family that is with us tonight. Mary and Charles Strange, uh, are here. Where are they?

**Donald Trump**

**00:10:28**

Where are, uh, they?

**Kristi Noem**

**00:10:28**

Oh, here they are, sir. They're behind us over here tonight.

**Donald Trump**

**00:10:31**

Come on up here. Come, um, on.

**Kristi Noem**

00:10:33

They lost their son, Michael.

**Donald Trump**

00:10:35

Come on up.

**Kristi Noem**

00:10:36

Come on up here.

**Donald Trump**

00:10:45

It's a little harder to get up since I got shot. They've made it more difficult. Perhaps that's the way it's supposed to be, sir.

**Kristi Noem**

00:10:52

They lost their son Michael.

**Charles Strange**

00:11:07

Under Obama.

**Kristi Noem**

00:11:09

Did you want to say anything?

**Donald Trump**

00:11:10

Under Obama is right. Under Obama. Uh, please, on behalf of your son.

**Charles Strange**

00:11:18

I would ask, mister President, my son was killed August 6, 2011, with 29 other men.

**Donald Trump**

00:11:24

It was the biggest loss of life.

**Charles Strange**

00:11:25

In the Iraq and Afghan war. It was the biggest loss of life in a single day in the history of America. 22 of them were Navy special warfare. Till to this day, we still haven't gotten any answers. I was wondering, I'm begging you. We would like a congressional hearing.

So here's what we're going to do. In the first week, let me have it. Not the first day, because I made a lot of promises in the first day. We're going to drill, baby, drill. We're going to close up the border. We're going to do a lot in the first day. In the first week, we will set up a commission.

**Donald Trump**

**00:12:01**

We're going to find out, because so many people in your same position, they want to know what happened. Why did it happen to their son or daughter? And we're going to do that within the first week. So you get ready to come over to the White House. Okay? Thank you.

**Charles Strange**

**00:12:15**

All right, mister President, got to say one more thing. I want to let America know. June 2017, President Trump and his wife had me and my wife bring 20 gold stars to the White House. Him and his wife stayed the whole time. They had food, drinks. They did a candle ceremony for us.

**Charles Strange**

**00:12:37**

President Trump stood up every time, saluted the gold star parents.

**Donald Trump**

**00:12:45**

That was both a celebration, a remembrance. It had all emotion, right? They were happy, they were sad, they were devastated. Uh, they remembered their beautiful boy, right? Yes, their beautiful boy. And we're not going to forget. We're going to find out what happened. We're going to do that within the first week. And, uh, you have my word.

**Donald Trump**

**00:13:06**

Okay.

**Charles Strange**

**00:13:07**

Thank you, president. Thank you.

**Donald Trump**

**00:13:26**

Thank you.

**Kristi Noem**

**00:13:29**

Thank you, Mister Priscilla.

**Donald Trump**

**00:13:30**

What a nice couple.

**Kristi Noem**

**00:13:36**

Marion Charles daughter Rachel, is also here tonight. She is Michael's sister. So thank you, Rachel, for coming tonight, too. And God bless you and your family. Thank you for your service and your sacrifice.

**Donald Trump**

**00:13:50**

Thank you, Donald. Yes, thank you, Honor. That's tough stuff.

**Kristi Noem**

**00:13:56**

Yes. Thank you for your commitment to, like.

**Donald Trump**

**00:13:58**

Uh, what we were discussing in Afghanistan with the 13 family members. They feel that bad, uh, things happened. Stupid things happened. And you hate for that to be. And it's your son or your daughter, they deserve reason. It should have never happened in Afghanistan, I can tell you that. The 13 that died, and, you know, they don't mention there were many people wounded, too.

**Donald Trump**

**00:14:19**

And I mean seriously wounded with the legs and the arms and the face. And, uh, we're going to give them everything they want. I've gotten to know those families. Thanks.

**Kristi Noem**

**00:14:30**

Thank you, sir. Sir, our next question tonight is from Angelina, who I believe is right here if you want to come forward. Angelina.

**Donald Trump**

**00:14:40**

Hi, Angelina.

**Angelina**

**00:14:41**

Hi. Good evening, mister president.

**Donald Trump**

**00:14:43**

Let me stand out for you. Go ahead.

**00:14:45**

My name's Angelina, and I was raised in a Philadelphia Democrat household, a union household. As, uh, a mother of a blended family, my top issues are the same issues that face all Americans. Illegal immigration hurts black Americans, inflation hurts black Americans, and dangerous cities hurt black Americans. Like my fellow Americans. My grocery bill has not gone down.

**Angelina**

**00:15:18**

Everything is still so very expensive. What steps will your administration take to help american families suffering from this inflation?

**Donald Trump**

**00:15:26**

So, you know, it's such a great question in the sense that people don't think of grocery. You know, it sounds like not such an important word when you talk about homes and everything else, right? But more people tell me about grocery bills where the price of bacon, the price of lettuce, the price of tomatoes.

**Donald Trump**

**00:15:42**

They tell me, uh, and we're going to do a lot of things. You know, our farmers aren't being treated properly. And we had a deal with China, and it was a great deal. I never mentioned it because once Covid came in, I said that was a bridge too far, because I had a great relationship with President Xi, and he's a fierce man, and he's a man that likes China.

**Donald Trump**

**00:16:01**

And I. I understand that. But we had a deal, and he was perfect on that deal. \$50 billion he was going to buy. We were doing numbers like you wouldn't believe for the farmer. But the farmers are very badly hurt. The farmers in this country, we're going to get them straightened out. We're going to get your prices down.

**Donald Trump**

**00:16:18**

But you asked another question about safety and also about black population jobs, and hispanic population in particular, those two. So when millions of people pour into our country, they're having a devastating effect on black families and hispanic families more than any others. I think it's going to spread to a lot of other places.

**Donald Trump**

**00:16:40**

I think it's going to spread to unions. I think unions are going to have a big problem because, uh, you know, employers are just not going to pay the price. They're going to, and it's going to be, it's a very bad thing that's happening. So they're coming in. Many are coming in from jails and prisons and mental institutions, and that's like, you know, a step

above, right, a saint asylum.

**Donald Trump**

**00:16:59**

And whenever I go, uh, Hannibal Lecter, you know what I'm talking about? They always go, the fake news. That's a lot of fake news back there, too. They always mention, you know, it's a way of demeaning. They say, Hannibal Lecter. Why would he mention, well, you know why? Because he was a sick puppy and we have sick puppies coming into our country.

**Donald Trump**

**00:17:23**

I figured that's a lot. That's better than wasting a lot of words. You just say, hannibal Lecter, we don't want them. But they always sort of say, why would he say that? I do it for a lot of reasons, but I do it because we are allowing some very bad people into our country, and they're coming as terrorists.

**Donald Trump**

**00:17:39**

You know, you saw the other day last month, they had the record number of terrorists. I had a month. And I love border patrol. Did you see? They gave me a full endorsement two days ago, the border patrol. And they're great. And, you know, they want to do their job. They don't want to let these people come in.

**Donald Trump**

**00:17:58**

They look at them, they can tell. They can, they can look at somebody say, good, bad. They say, what's coming into our country now? It's having a huge negative impact on black families and on hispanic families and ultimately on everybody. And we're going to close that border so tight it's going to be closed.

**Donald Trump**

**00:18:16**

And, and I said the two things I'm going to do first, we're going to close that border and people are going to come in. You want people to come in? We need people to come in. People are going to come into our country legally. You know, it's so unfair. You have people that are waiting on a, uh, system, on a line, and they've been waiting on this line, you know, how long for?

**Donald Trump**

**00:18:37**

Years, ten years, twelve years. And they study and they take tests and then people come. I actually say, why don't you just go on the, just come on across. I tell people that it's terrible, right? I said, go out. You're incredible. They say, what can I do to speed up the process? I say, you know what?

Go to the southern border. I'll see you on the other side. Uh, it's so unfair. But we're going to have them come in legally. You have to see what they have to do. They take tests on, you know, who is the first one here. What date was this? What does 1776 mean? All the stuff.

**Donald Trump**

**00:19:09**

And these other people are coming in and they're affecting the school system and they're affecting the hospital system. I mean, if you take a look at what's going on in Springfield, Ohio, a town of 50,000 people, they've just added 32,000 people, illegal immigrants. And we're not going to put up with it and we're going to take care of, your costs are going to come down and you're not going to have a problem with, uh, because the biggest problem, and I'm hearing it from black people and to a lesser extent right now, but it'll be the same hispanic people.

**Donald Trump**

**00:19:42**

And I'll tell you what, our poll numbers have gone through the roof with black and Hispanic have gone through the roof. And I like that. I like that. I like that. So we're going to take care of it. You will be, I'll tell you if everything works out, if everybody gets out and votes on January 5 or before, you know, it used to be you'd have a date.

**Donald Trump**

**00:20:06**

Today he can vote two months before, probably three months after. They don't know what the hell they're doing. But we're going to straighten it all out. We're going to straighten that out, too. We're going to straighten our election process out, too. That's going to be important also. So thank you very much, darling.

**Donald Trump**

**00:20:20**

We're going to get it straight. Thank you.

**Kristi Noem**

**00:20:22**

Thank you, Angelina. Mister President, we had in the last year, over 800,000 Americans lose their jobs in this country. But 1.2 non citizens took those jobs. They're filling the jobs that Americans could have to provide for their families. And Kamala Harris has been in charge of this border. She is the one who has been the border czar, who has facilitated this invasion.

**Kristi Noem**

**00:20:45**

I've always called it an invasion and a war zone down there because we see the criminals and the terrorists coming across.

It is an invasion like we've never seen before. And, you know, if it was an invasion of people that deserve to come in or that will love the country will be great. You know, she used to go around saying, they don't commit crime. Have you seen the gang from Venezuela? What they've done in Aurora, Colorado?

**Kristi Noem**

**00:21:09**

It's only a few. According to Martha Raddatz. According to Martha Raditz. Oh, it's just a few apartment.

**Donald Trump**

**00:21:14**

And by the way, it's hundreds all over the country. And they're, uh, they're like me. They're in the real estate business, but they take it over with rifles. They take it over with a level of sophistication, because you know a lot about guns from where you come and you like it. And I'm a big protector of the second amendment.

**Donald Trump**

**00:21:31**

We've gotten totally endorsed, and if you think that's easy, it's not easy, but the NRA gave me total endorsement. I assume you got total endorsement. We have no choice. We have to have it. I mean, especially when you have. You know, it's amazing. These radical left lunatics, they want everybody to come into our country.

**Donald Trump**

**00:21:52**

Many of those people are criminals. And then they want to also take you guns away simultaneously. They don't want your guns, but they want them to come in. So you need it for protection. You know, if somebody knows that you have a gun in your house, they say, let's go after somebody else.

**Donald Trump**

**00:22:07**

People put signs under this gun, or we have some of them actually spell the kind of a, uh, gun they have. We have an AK 47 inside. And people say, you know what? Let's just. And I knew about an AK 47 from a few weeks ago. And the AR 15, I know about that one, too.

**Donald Trump**

**00:22:27**

I know a lot. But you know what? You have a lot of bad people out there, and you can't, you know, it just can't be a one way street. You know, one thing, because she wants to take your guns away. If you take them away, the bad guys are not giving them up.

**Donald Trump**

**00:22:40**

That's the only thing. I don't think the good people are giving them up, either. You want to

know the truth, but the bad guys, the bad guys are not giving up their guns. That's the only thing I know for certain. Right.

**Kristi Noem**

**00:22:52**

Your, uh, JD Vance did a fantastic job on Sunday morning, calling out the fake news. Yes. For how they're trying to diminish the devastation that's going on in some of these communities. And Kamala Harris has facilitated losing 300,000 children as well, since she's been in charge of the border. I always say that they're not missing children, that they are trafficked and kidnapped and murdered children because they've come across that border.

**Kristi Noem**

**00:23:17**

And we have no idea where those children are. And we know how devastating it is, what's happening to their lives right now with what she's facilitating.

**Donald Trump**

**00:23:25**

I think that, you know, all bad numbers, we have a lot of bad numbers. There's so much bad happened in this administration. It's disgraceful. You know, as an example, there'd be no war with Russia and Ukraine. There's no way. I get along very well with Putin. I got. I fully understand what's happening.

**Donald Trump**

**00:23:41**

It was the apple of his eye. He used to talk about it, but I said, you're not going in. And he wasn't going in to. It's only because of Biden. He looked at this guy. He can't even believe it. But the same with Ukraine. I got along very well with Zelenskyy. Very well.

**Donald Trump**

**00:23:55**

In fact, he came to New York two weeks ago. He came to see me, and I got along very well with him. I'm going to negotiate that thing out that is now a death trap. You have cities that are all down. Those gorgeous golden domes, those magnificent domes are laying on their side, all busted up after, I don't know, they're a thousand years old or something.

**Donald Trump**

**00:24:13**

The heritage, what's happened there. But many more people are killed than they're reporting. They knocked down. That was my business. They have apartment houses that are really, they're like three blocks, city blocks long, not that tall, but pretty tall. And they are big, and they knock it down with a missile. And they say two people were slightly injured.

No, a lot of people. The number of people dying in the Ukraine, Russia war is a far greater number than anybody knows. And Biden has done nothing about it. He hasn't even spoken to Putin in over a year, know nothing about it. And this is a war that has to end, and we're going to get that war ended.

**Donald Trump**

**00:24:49**

I'm going to try, and I think I can get it ended as president elect. In other words, before I even take over the White House, got to stop the people from dying. They said to me, well, whose side are you on? I was interviewed by fake news, CNN, you know, fake news. Uh oh.

**Donald Trump**

**00:25:08**

Their camera just went off. Their camera just went off? Uh, no, no, their camera just went off. Okay. It always happens. Whenever I point to them, immediately they turn off, because they know it. But I was ah, Caitlin Collins, a nice person. But Caitlin Collins is interviewing me and she said, well, who saw do you own?

**Donald Trump**

**00:25:31**

I said it's not a question of size. I want people to stop dying. That's all. I want people to stop dying. And you know, it was a very interesting thing because it was a CNN, it was like this, a smaller room, much smaller. This is that big room.

**Kristi Noem**

**00:25:47**

Big room.

**Donald Trump**

**00:25:47**

This is a very big room. But it was a much smaller room. But they had all people in there from CNN within the first five minutes. They were totally on my side because it's common sense and we're now the party of common sense. I say it, we're conservative, but we're the party of common sense.

**Donald Trump**

**00:26:04**

We need walls. We want good education, we want low interest rates. We want to be able to buy a house. We want jobs. And you know what? We want a strong military. I rebuilt our entire military and we want a strong military. And ideally a strong military that we don't have to use.

**Donald Trump**

**00:26:22**

Is that even better? We'll have a strong military if we don't have to use it. That's even better.

I love it. I love it. So Mister president, let's get back to our questions. We have Yanni who's waiting to ask you a question. Has been waiting a long time. Yanni. Uh, welcome. It'll just give them 1 second. Here they come, right behind you.

**Yanni** 00:26:50  
Thank you. All right. Thank you for being here today, Mister President. Mister President.

**Donald Trump** 00:26:54  
Thank you.

**Yanni** 00:26:54  
To answer questions from all the voters of Pennsylvania and just to work hard and show support. I appreciate that.

**Donald Trump** 00:27:02  
Thank you.

**Yanni** 00:27:03  
Um, I'm a small business owner, uh, in Lansdale. I have a small breakfast, lunch, restaurant, coffee corner. And to be honest, Mister President, I really am praying for you to get in there and change the policies. Um, ever since the gas prices started spiking, I noticed literally everything started spiking from deliveries to services, goods, even, even maintenance, overall maintenance.

**Yanni** 00:27:34  
Everything just spiked up and it's really hurting small businesses, small business owners and those who work within them. So um, my question is, what's your plan to help bring common sense back and help small businesses that got destroyed by Democrats after Covid and the Biden administration.

**Donald Trump** 00:27:53  
So great, because small businesses are actually bigger than big businesses when you add them all up and it's very important and sounds like yours, I would love your food. I can tell by looking at that guy. I think I'd like to go over there if I am. If I'm over there, I'm going to stop it.

**Donald Trump** 00:28:10  
Uh, the fact is that, you know, they want to get away from gas. And I have friends. They're

into the cooking world. I'm not. I just like to eat, but they're into the cooking, and I don't know how you feel. It sounds like you. They feel that you really. Gas is much better than the electric for cooking, right?

**Donald Trump**

**00:28:28**

And they have this thing about, you know, they want to put gas out of business, right? No gas. You know the amazing thing, we don't have electric in this country, but we have all the gas you can news. We have all the. We have oil and gas. That's what we have. And even the cars, if you look, they want to go with all electric cars.

**Donald Trump**

**00:28:43**

California's having blackouts every week. Brownouts, blackouts. And then they come up with rules and regulation to go to all electric, but they can't even supply what they have. It's so nuts. Uh, we're going to get, number one. Your utility cost. You heard me say it before. Your cost will be down, and we're getting rid of all the elected.

**Donald Trump**

**00:29:02**

If you want electric, great. And if you want gas, great. The only thing you can't have is a hydrogen car, right? You heard me say that, right? Because you know what happens? They have a new car. They say it's great, but it's got one problem. You know what the problem is? Every once in a while, one will blow up.

**Donald Trump**

**00:29:16**

And if it does blow up and you happen to be inside of it, you're in bad luck because you're not recognizable. Do you know that? It's the new thing, hydrogen. I said, no, thank you. I don't want it. I don't want. They called the wife. That's not my husband. Oh, yes, it is.

**Donald Trump**

**00:29:29**

Uh, it's no good. So if we get your energy costs, your energy costs will be down by 50%. Your interest is going to come down, and people are going to start to make. Not only you people will have more money to go to your restaurant. You're going to have a great business. And, you know, during COVID I was the one that worked out the loans.

**Donald Trump**

**00:29:47**

I don't know if you got one, but everybody, so many people got millions of small businesses. And Linda McMahon was the head of small business administration, which was a big business, but she was the head, and she was phenomenal. Linda McMahon was phenomenal. So many people tell me about her that she was one of the best, uh, secretaries, but Linda McMahon was in charge, and they loaned millions of dollars, uh,

billions of dollars, out to people with small businesses.

**Donald Trump**

**00:30:13**

And it was the greatest investment we made. It stopped us from going into a 1929 depression, which is exactly what we would have had. And she did a fantastic, she did a fantastic job. We're going to get your costs way down. Thank you. Thank you.

**Kristi Noem**

**00:30:32**

Mister president. My state, I always tell people, it's hot in the summer, it's cold in the winter, and it's a long ways to drive anywhere, which I think a lot of Americans are experiencing, that no matter what, you're energy dependent. And since Joe Biden has been in the White House and Kamala Harris has supported every single one of his policies.

**Kristi Noem**

**00:30:51**

Did you hear her on the view? Did you hear her say she wouldn't change a thing from what Joe Biden has done? It has cost, it's cost the average american family \$4,500. Just in energy costs. Just in energy costs.

**Donald Trump**

**00:31:10**

Hold a doctor, please. Doctor. Thank you very much. We have incredible people. They come here hours before and it's a little hot. And, uh, so we, uh, they're with us all the way. We got to respect them. And m. You take your time, doctor. Take your time. Thank you very much. We always have great doctors in the audience.

**Donald Trump**

**00:31:38**

We've never had too much of a problem. Look at the quality of care we have. It's incredible when you think right. These people, first responders, our first responders are amazing. The way they can do things so beautifully and quickly. Thank you. We'll get it taken care of fast. A lot of it's pretty easy to take care of.

**Donald Trump**

**00:32:29**

Hardest thing is going to be the border, though, in terms of the people that have been let in, the people that have been led into this, this country, what they're doing, where do they come from? What are they doing? What's their thought process when they allow a thing like that to happen? Let's wait till they take care of this incredible person who I guarantee you is a great patriot.

**Donald Trump**

**00:32:50**

I guarantee it. Everybody in this room is a patriot. Thank you, Dylan. Thank you. Some,

some problems. Some problems. That looks a little bad. That looks a little bit bad. Don't worry. We'll extend for a little time. Okay. We're not going to lose anything. We just want to make sure there, fine. This is a little bit of a tough one, I think.

**Donald Trump**

**00:34:48**

Little tough president, because you care. Amazing. M. God. M m. You know, while we're waiting. So we had a beautiful evening, and I don't know if they could get this song up quickly, but if they could work really quickly backstage while we're waiting. Uh, Ave Maria we had Ave Maria the other day in Butler, Pennsylvania.

**Donald Trump**

**00:36:20**

And Butler, we had 101,000 people. It was the most celebration. Cory, I call it Cory. The firefighter, the chief, he was great. And if they could play Ave Maria, if you can get it, Justin, let's go. If you can. A little quick notice. Ave Mariah. M m hey. Hey. Great. We love that man.

**Donald Trump**

**00:37:34**

We love that Mandev. It's so beautiful, though, right? Uh, listen to that. It's nice. He's gonna be okay. We have nice music. We're together. Not bad.

**Kristi Noem**

**00:38:01**

Yes.

**Donald Trump**

**00:38:01**

Not bad, right? So beautiful.

**Kristi Noem**

**00:38:06**

Thank you, m mister President.

**Donald Trump**

**00:38:07**

Thank you, everybody, very much, everybody, for your patience.

**Kristi Noem**

**00:38:10**

Yes, yes. We'll be praying for him. Yep. Thank you, sir. Sir. As we talk about how things have gotten harder under this administration and how Kamala Harris policies have been so dangerous for the american people, there's someone here tonight who wanted an opportunity to ask you a question. Her name is Heather. And, Heather, would you please stand?

She's right here. And she is so thrilled to be talking to you tonight, mister president.

**Heather**

**00:38:40**

Good evening, President Trump. My name is Heather, and I was a registered Democrat for most of my life. Uh, but not anymore.

**Donald Trump**

**00:38:51**

She's on our show.

**Heather**

**00:38:53**

Yes, I saw the light. I no longer identify with the democratic party. Um, they've put criminals and foreign enemies ahead of american citizens. The border is the issue of, uh, this election, because if we can't secure the border, we won't have a country. We know that you're going to finish the wall, but how are you going to handle the deportation of criminals?

**Donald Trump**

**00:39:36**

So if you've watched any of our last rallies, we have a criminal aliens act of 1798. That's a long time ago. And it gives the president tremendous power to do what has to be done to secure our country. And you're right, you know. Um, so if you look at the polls, it says that the number one issue is the economy, number two is inflation.

**Donald Trump**

**00:40:00**

Let's even put them together. And number three is the border. I disagree. I think I agree. I do agree with you. The number one issue this country has steaming in here. M open the door or get on the open.

**Kristi Noem**

**00:40:45**

Do you want me to go tell them.

**Donald Trump**

**00:40:48**

No? Yeah.

**Kristi Noem**

**00:40:50**

Yeah. President is wondering.

**Donald Trump**

**00:41:58**

Thank you very much. M take your time, doctor. Gonna be good. M the doors. I wish we

could open those doors to outside. M yeah, take your time, doctor. For security reasons, they can't. But you know what? I should just open them. Um, because anybody comes through those doors, you know what's going to happen to them.

**Kristi Noem**

**00:44:14**

It looks like, sir, she's on her feet and walking out. Let's encourage her.

**Donald Trump**

**00:44:19**

Thank you.

**Kristi Noem**

**00:44:21**

Let her know we'll be praying for her. And I know it's really warm in here. Everybody agrees that it's really warm in here. We've got a lot of people who love America. I'm going to ask that if you have a chair, maybe sit so everyone around you can sit and still see the president and ask him questions.

**Kristi Noem**

**00:44:40**

Maybe that will help us and we.

**Donald Trump**

**00:44:41**

Can spend a little more time. And personally, I enjoy this. We lose weight, you know? No, you lose weight. We could do this. Lose four or five pounds. It's okay with me.

**Kristi Noem**

**00:44:51**

Kamala Harris is.

**Donald Trump**

**00:44:52**

But some people have been waiting here for two days for this. So, you know, it's a little bit, it's a little bit tough. It's a little bit tough. But they're going to try and get those doors open.

**Kristi Noem**

**00:44:59**

Yes. Ah.

**Donald Trump**

**00:45:00**

And I don't know whose building this is, but if they had air conditioning. Do you see any air conditioning?

They probably can't afford it, sir. In this economy.

**Donald Trump**

**00:45:10**

That's right. Uh, they don't want to give us air conditioning. It's too expensive. It costs too much anyway. But they're both okay. They're both, they're both in good shape.

**Kristi Noem**

**00:45:20**

That's wonderful.

**Donald Trump**

**00:45:21**

Would anybody else like to faint? Please raise your hand.

**Kristi Noem**

**00:45:25**

Let's do it now.

**Donald Trump**

**00:45:25**

Please raise your hand. You know what we could do, though? If my guys can do it, how about we'll do a little music? Let's make this a, uh, musical fest. Oh, looky, lookye. Oh, that's great. That's great. Because it's nice and cool outside, right? Yes, it's nice and cool. Um, why don't we, and I mean this, if my guys can hear me, two things.

**Donald Trump**

**00:45:54**

Put up the chart, my favorite chart, my all time favorite chart. And let's listen to Pavarotti sing Ave Maria. Can you hear that? They gave me the Ave Maria with no voice. There it is. That's my favorite piece of paper anywhere in the world. I sleep with it every night. I kiss it.

**Donald Trump**

**00:46:17**

I kiss it. And you see those numbers, by the way, for those that we talked about, you know, the border, when you're talking about the border, look at the numbers. That was the lowest it ever was right there. That was the last day I was in office. And we're going to get it lower than that.

**Donald Trump**

**00:46:32**

But we're going to let people come in. We're going to let people come in. So very, very important. But there's one of my most favorite. If I didn't turn to the right, I wouldn't be here with you right now. So, uh. It's sort of a cruel world, but I was very proud of that before the fact.

Now, even if it had lousy numbers, I would love that piece of paper a lot. So put on Pavarotti singing Ave Maria nice and loud. Turn it up louder. We want a little action here. Turn it up louder. Uh, Mari Agra. That's for your boy. That's for your boy. That's for your boy.

**Donald Trump**

**00:47:43**

Stand up. That's for their boy, Sadeena. Mhm. Bro. M m m. Thank you.

**Kristi Noem**

**00:50:04**

It's beautiful.

**Donald Trump**

**00:50:06**

Let's not do any more questions. Let's just listen to music. Let's make it into our music. Who the hell wants to hear questions, right? That's. Isn't that beautiful? That's so beautiful. We played that in Butler, Pennsylvania. We had a moment of silence, and then we had the bells of Notre Dame go off.

**Donald Trump**

**00:50:26**

And then we had a great opera singer, Christopher, who was so incredible, and a great, great opera singer. That's Pavarotti. Pavarotti, I guess, is, uh. I actually asked Christopher, I said, uh, your voice is incredible. How does it compare to Pavarotti? No, no, no, sir. He was the maestro. He was the greatest of them all.

**Donald Trump**

**00:50:45**

And this man's voice, you all probably heard it, he was phenomenal. But he said, no, no, no. Pavarotti was the greatest. Maybe, uh, we'll play time to say goodbye when we end. Ok.

**Kristi Noem**

**00:50:56**

Sounds fantastic.

**Donald Trump**

**00:50:57**

All right. Do we want to do that? We'll have a little instead of your normal, like, rock out of the place, and then you're going to say time to go to Biden, you're going to go vote. We're going to win the state of, you know, we win Pennsylvania, we win the whole thing.

**Donald Trump**

**00:51:11**

We're going to win. We're going to win. If we win Pennsylvania, we're going to win the

whole thing. Right? So, uh, it's going to really be something. We, um. We just had some numbers coming out of Virginia, which is great. We have numbers, uh, coming out of. We win this commonwealth, we win the commonwealth of Pennsylvania, we are in clover.

**Donald Trump**

**00:51:38**

And then we're going to fix our country, and we're going to fix it fast. We're going to fix it fast. So get that song done.

**Kristi Noem**

**00:51:46**

Okay?

**Donald Trump**

**00:51:46**

Get that song ready. And when we leave, we're going to have a beautiful. You could just sit, by the way, when we leave, you don't have to go so fast. You could sit and listen. We'll play a couple of songs. Some of you will be a little warm, but that's okay. It's not a bad thing.

**Donald Trump**

**00:52:01**

And if you want, we're gonna do that. But I think it would be beautiful. Don't you think a little different?

**Kristi Noem**

**00:52:06**

I think it'd be amazing, sir.

**Donald Trump**

**00:52:07**

Nice to have imagination. Isn't it a nice thing to have imagination? It's like when Kamala's teleprompter went out the other day. She was at 32 days. Did you see that?

**Kristi Noem**

**00:52:19**

I did.

**Donald Trump**

**00:52:20**

She loses teleprompters, and you wouldn't know that. She lost it. Me lose? Me. I always lose. You know, if you're a politician, you can count on 5% of the time you lose a teleprompter, sometimes really badly, like in the middle of a sentence, and you say, oh, that's a good, you got to have a good memory.

**Donald Trump**

**00:52:35**

If you don't have a good memory, you can't be much of a politician. But they go out. Sometimes if you're outside, the wind blows them down. I had one in Ohio. We had 45 miles an hour winds. And I said, I'm going to lose these suckers. And within about the first two sentences, they were gone.

**Donald Trump**

**00:52:50**

They were off the street.

**Kristi Noem**

**00:52:51**

I was at that rally.

**Donald Trump**

**00:52:52**

But Bernie Marino, who's now doing very well, I understand the senator, so I think he's doing very well. But we'll listen to a couple of songs if you want, and that's okay with me. I like it. So we'll do that. Uh, we'll do those songs that we had mentioned, Justin. And if Justin doesn't get it right, he gets fired.

**Donald Trump**

**00:53:10**

Okay, sorry.

**Kristi Noem**

**00:53:12**

I have a quote that I like a lot by John Wayne. It says, life is hard, but it's harder when you're stupid. Yeah, I think that perfectly explains Kamala Harris. Right? Right, sir. Now, our life has been hard because of her, but can you imagine what it's like to wake up as Kamala Harris?

**Kristi Noem**

**00:53:30**

How hard life must be? My goodness.

**Donald Trump**

**00:53:32**

Well, we have to beat her. Look, we do. We have to beat her. She's not, she's not for this job. Everybody knows it. Look, we're running against her. We're running against a very powerful and a very corrupt machine. That's what it is. She's just. And the same thing with Joe Biden. Joe doesn't know where the hell he is.

**Donald Trump**

**00:53:48**

You know, when you talk about Biden, he got 14 million votes. He won the primary, and we had a debate. His numbers were very bad. And it looked like we were going to win. You

don't know what's going to happen, but it looked like he was down substantially. They went to see him and they said, you're getting out.

**Donald Trump**

**00:54:06**

He said, I don't want to get out. I won. You're getting out. That was the overthrow of an american president. You could call it a coup, but I don't even call it that anymore because a lot of people say, what the hell is who? You can call it that, but it was really basically the overthrow of an american president.

**Donald Trump**

**00:54:21**

And frankly, she's doing horribly right now. You saw 60 minutes where they replaced her answer with another answer. She's doing horribly. I have a feeling he might have done better than her. Let's see what, you have to see what the end is. Maybe they would, uh, maybe they made a good move. But when they talk about a threat to democracy, how about where they take a candidate who wondehenkhe fair and square, they throw them out and they put up a woman who failed was the first one to drop out of a field of 22 and got no votes.

**Donald Trump**

**00:54:50**

And this is the person we're running against. And she is not a smart woman. That's true. And we cannot, we've had that for four years. We're not going to have it for another four years. We're not going to have it.

**Kristi Noem**

**00:55:01**

That's right. So we're not going to complain about things. We're going to fix them, right? We're not going to complain. We're going to fix them. And you are going to fix them right here in Pennsylvania by showing up and voting for President Donald John Trump. We're going to make America great again. Right.

**Donald Trump**

**00:55:23**

Those doors are open. That feels good.

**Kristi Noem**

**00:55:25**

It does.

**Donald Trump**

**00:55:26**

I feel it right now. I don't know who's out there trying to get in, but there, uh, but you know what I feel? Doesn't that feel nice?

Yes.

**Donald Trump**

**00:55:33**

And you don't even have, there's nothing like outdoors. You don't even have the cost of an air conditioner if they have them in this beautiful factory. Anyway, go ahead, please.

**Kristi Noem**

**00:55:43**

Well, sir, do you want to play your song and then greet a few people, or do you want to, well, you had said you wanted to close with a specific song. Okay, let's do a couple of fast questions.

**Donald Trump**

**00:55:53**

So, Justin, how about a couple of really beauties and we'll sit down, relax. Let me just give you the bottom line, though. Uh, we win Pennsylvania, we win this great commonwealth, we are going to win the whole ballgame it's such an important place and we relate. And we are up in the polls fairly nicely.

**Donald Trump**

**00:56:14**

Fairly nicely. But it's really important. And we're going to turn this country around. It's the greatest movement in the history of our country. Maga make America great again. When Biden go on, he used to go on, say, we will stop Maga. We will stop. You know, remember with the purple background, the pink and purple, he looked like the devil, right?

**Donald Trump**

**00:56:32**

But she's worse than him. Remember it? But they would say, we're going to stop Maga. They go, Maga means make America great again. I mean, what are you going to stop? And we are indeed going to make America great again. America has never, we're a declining nation right now. We're a nation in decline, and we're not going to be in decline for long.

**Donald Trump**

**00:56:53**

Let me tell you, every country respected us four years ago. We were energy independent. We had everything. We had the greatest economy in the history of our country. We're going to bring it back bigger, better and stronger than ever before. Go and vote. Let me hear that music, please, everyone.

**Kristi Noem**

**00:57:10**

Let'S thank President Trump nice and loud. God bless you. Send President Trump back to the White House.

Thank you, everyone.

**Kristi Noem**

Thank you, everyone.

**00:57:22**
